Hold On

Moodorama

Holdin' on You're better holdin' on to what you've got You're better holdin' on That's what I'm asking you for

Going on You're better going on and save my life You're better going on And save my life At least for a little while Just save my life At least for a little time Just save my life That's all I'm asking you for

At least for a little while Hold me at least for a little while At least for a little while Gimme some of your love

Drop down the tear Wipe out your eye And leave it all far behind Hold on to me Just stay for a while I will be there if you don't mind
