

My favorite song plays on the radio
The memories rush back, here we go
Now we're singing loud cuz everybody knows
I remember first time that I heard it
Dancing and soaking in every word
It was the one that always brought us together oh oh

So raise your glasses
To the Classics
Make em last no
Don't ever let them die
Oh the past is
Neon backlit
Greener grasses
On the other side

I wore out the mix that you made for me
Burned in my mind and on cd
Magic marker etched it permanently
Drive around spinning it out for days
Slow roll taking it the long way
Going nowhere but we're going together oh oh

So raise your glasses
To the Classics
Make em last no
Don't ever let them die
Oh the past is
Coming back with
Greener grasses
On the other side

So raise your glasses
To the Classics
Make em last no
Don't ever let them die
Oh the past is
Neon backlit
Greener grasses
On the other side

On the other side...
