

Be Free

Moonchild

There's something on your mind
It's easy enough to see
Release it to the sky
And let me put your mind at ease

Underneath the stars again
Tempted by uncertainty
Just be still and take it in
Let your mind and body be free

Beneath the same night sky
Your troubles drift away
We'll love and feel alright
My world is yours til night is day

Underneath the stars again
Tempted by uncertainty
Just be still and take it in
Let your mind and body be free
