

You Got One

Moonchild

I care
I'm gonna be there
Doesn't much matter what we do
Long as there's room for two

I care
I'm gonna be there
Maybe it seems you don't have much to count on
But you got one, you got one

Why don't you see
It's hard but don't have to be
Take it all from me
Cause I'll give you what you never dreamed
I got you
But don't you know you got me too

You got one, you got one
You got one, you got one
You got one, you got one
You got one, you got one

Rest assured
That's for sure
You got one, you got one

I care
I'm gonna be there
And when I don't know what you're going through
Just know that I love you

I care
I'm gonna be there
Maybe it seems you ain't got much to count on
But you got one, you got one

Why don't you see
It's hard but don't have to be
Take it all from me
Cause I'll give you what you never dreamed
I got you
But don't you know you got me too

You got one, you got one
You got one, you got one
You got one, you got one
You got one, you got one

Rest assured
For sure
You got one, you got one
You got one, you got one
