

# Blaze Away

Morcheeba

It's Morcheeba and Roots Manuva  
And we are together in unity  
Into the furnace we blaze away  
Forevermore

No doubt, this life  
Ready to roll left and right  
We're giving it up and bringing it all to light

Can't live in the dark  
Forgetting what's real without the spark  
You better believe it's there to retrieve in you

You got to celebrate and get in time  
Gotta learn to step around the jealous kind

Come down, up high  
They're gonna eat some humble pies  
So gimme the knife  
I'm sharing a slice or two

Light it up

Big love, ignite  
Already in flames and we're alright  
Feel the fire, blaze away  
We blaze away

Oh no, baby don't cry  
Spin it around, tears will dry  
With deep desire, here we stay

Something pours out when I think of love  
Mentally blazing away, discuss  
Ransoms and randomness, scare the phantoms  
With esoteric seasonings  
Of the most high and I, and I know  
Love to share like we don't care  
Inside the flames may feel a change  
Being up standing, more outstanding

Make it to the plateau, we never let go  
And we got that saving grace  
No more hatred, love for the lovers  
She's my one and only, I'm no phoney

Told you before, don't mess with my legacy  
Let it be greatness, we can't fake this  
Making the statements up to the gateway  
We do it straight away because

It's only love to save us from the rut  
From the rut, from the rut  
It's only love to save us from the rut  
From the rut, from the rut

What next, what now

Live and let live and loose the cloud  
Now that you're free  
You're clearer to see the view

Oh me, oh my  
Stuck in that line all this time  
You gotta step up  
'Cause you're now at the front of the queue

We're gonna celebrate and get in time  
Gonna learn to step around the jealous kind

Come down, up high  
They're gonna eat the humble pies  
So gimme the knife, I'm sharing a slice or two

Big love, ignite  
Already in flames and we're alright  
Feel the fire, blaze away  
We blaze away

Oh no, baby don't cry  
Spin it around, tears will dry  
With deep desire, here we stay  
Blaze away

It's only love to save us from the rut  
From the rut, from the rut  
It's only love to save us from the rut  
From the rut, from the rut
