

# Elephant Clouds

Morcheeba

Follow the beat of the song  
My shoes are off, and the player is on  
All the sinners will see me  
Dancing around tonight

Elephant clouds in the sky  
I got a feeling it's gonna be fine  
We'll exhale as we're screaming  
And beaming with delight

All so suddenly  
Light is shining over me  
For the lovers saw our needs  
Now the grass is green  
And all the soul can flow for free  
From the silver cloud above  
We got enough

Light me up into the sky  
'Cause it feels good  
So then you should  
And that's alright

Feeling fine, we are divine  
With those that would  
When it feels good  
You know that's right

Flowers and cinnamon buns  
We're gonna have what we want for once  
Get to see over the wall  
Where we find our wonderful

You are the crush of my life  
We'll make a killing with half of a pint  
Innocence leaving the room  
Now we're kissing in full view

This is summer love  
But giving it some, so we don't come down  
In and out and soaring high  
Chasing afterlife  
But it may not work out first time  
Better luck next time

Light me up into the sky  
'Cause it feels good  
So then you should  
And that's alright

Feeling fine, we are divine  
With those that would  
When it feels good  
You know that's right

It feels so good  
Well, then you should, right?

You and I are so divine  
And we're on fire

It feels so good  
Well, then you should now  
You and I are so divine  
And reaching higher

Light me up into the sky  
'Cause it feels good  
So then you should  
And that's alright

Feeling fine, we are divine  
With those that would  
When it feels good  
You know that's right

It feels so good now  
And then you should now  
It feel so good  
Then we should, then  
Keep on doing that thing  
It feels so good, right?  
You and I are so divine  
We're on fire
