

# Say It's Over

Morcheeba

This will not be easy to say  
This might be hard to hear  
If I could do it any other way I would  
But I have to come clear

If I close my eyes  
Maybe it will all disappear  
Disappointing clouds  
Maybe they won't interfere

All the faults and failures  
Betray the day when the  
Cowardly excuses get in the way  
Of wanting more

Dawn of the day and we're done  
Missing something  
Now we can say it's over  
Endings begin  
With an awful lot of maybes  
Let's make a start at goodbye

You acted as you did  
Like a selfish little bitch  
A sad ghost spilling my pain on the carpet  
The more I give the less I understand  
Why I'm here

No great surprise  
Words I needed to hear  
With all the signs  
Breaking won't be severe

Anxious complex feelings  
Enter the frame as we  
Stoke the fire but can't sustain the flame  
To make it roar

Dawn of the day and we're done  
Missing something  
Now we can say it's over  
Endings begin  
With an awful lot of maybes  
Let's make a start at goodbye

Gone as the days with sun  
Times a'wasting  
Now we can say it's over  
When we're caught  
Between that rock and hard place  
Let's make a start at goodbye  
Between that rock and hard place  
Make a start at goodbye
