

# Come Right Back

Morgan Page

You say you got things to do, all for you  
We both know that ain't the truth, tell me who  
Been taking your attention now, tell me how  
The secret conversations go down

Staring red-eyed, those late nights they're keeping you up  
Say you wish I could stay like I'm your favorite drug  
It's always not right, you're tongue-  
tied, just used to be loved  
And you come right back

Just before you go I want you come right back  
Just before you go I want you come right back  
Why you gotta pull on my emotions  
You're just like the ocean  
I want you come right back, come right back

Just before you go I want you come right back

Know that you're gon' change your mind down the line  
Back and forth a hundred times, tell me why  
When I gave you everything, let you in  
You used me, you're like best friend, best friend

Staring red-eyed, those late nights they're keeping you up  
Say you wish I could stay like I'm your favorite drug  
It's always not right, you're tongue-  
tied, just used to be loved  
And you come right back

Just before you go I want you come right back  
Just before you go I want you come right back  
Why you gotta pull on my emotions  
You're just like the ocean  
I want you come right back, come right back  
Come right back

Just before you go I want you come right back
