

# Firewalk

Morgan Page

I'm walking straight into the fire don't stop me  
I lit the match and drew the line and now we can't breathe  
And all that's left here is the spine of who we used to be  
The fire that we feel

Hold down our foundations  
Build walls with some patience  
It's all we have to make it  
And I'll walk, walk the fire for

I will walk the fire for

Secrets buried underground surround me  
Rising to the surface now and I'm sorry  
You know I went and cut the wire  
And now I'm left with scars never meant to go this far  
Fire for us

Hold down our foundations  
Build walls with some patience  
It's all we have to make it  
And I will walk the fire for

I will walk the  
I will walk  
I will walk the  
I will walk

The fire for us

Walk the fire for us

Walk the fire for us

I will walk the fire for us

Fire, fire...

I will walk the fire for us
