

Like I Do

Morgan Page

I'll be fine
I'll give you all the space you need
Take your time
I can't make you stay with me

Party's over and you're on your own
In a city that's so cold full of people you don't know
Turn the key but there's nobody home
You're all alone, all alone

Who will keep you up at night
Make you laugh until you cry
No no nobody can love you like I do
Who will be there at your worst
Hold you closer when it hurts
No no nobody can love you like I do
Like I do

Won't be long
Til there's someone sleeping next to you
But she'll be gone
When you need her there to lean into, ya

Party's over and you're on your own
In a city that's so cold full of people you don't know
Turn the key but there's nobody home
You're all alone, all alone

Who will keep you up at night
Make you laugh until you cry
No no nobody can love you like I do
Who will be there at your worst
Hold you closer when it hurts
No no nobody can love you like I do
Like I do

Like I do

Who will keep you up at night
Make you laugh until you cry
No no nobody can love you like I do
Who will be there at your worst
Hold you closer when it hurts
No no nobody can love you like I do
Like I do
