

Exhale

Morgan Rose

Holy angel
Forgive what I've become
They killed the man who was here
Now the urge controlling my every thought
Is telling me, disappear

All this love
Has me crippled to my knees
If only I could bleed
The worst is done
Now that I believe
I'll fade into the water
Where I can finally breathe
Where I can finally breathe

All this love
Has me crippled to my knees
If only I could bleed
The worst is done
Now that I believe
I'll fade into the water
Where I can finally breathe
Where I can finally breathe
