

Faster Man

Morgan Rose

Open your eyes
Feel the burden, burn your skin
Turn off the lights
And think of all that you've kept in
You can't deny
How the vision broke your will
The time is now
To take back all that once was here

The sick is all you see
The colors, they bleed
And get a reaction
To kill all that matters
The hate is all you feel
Covered in red
Call it a mystery
Caught in the misery
Let's all start running

Stuck in my mind
From the fallout once again
I can't describe
How the shit just pulled me in
I cut the line
But I still feel black and blue
I did my time
To get me far away from you
Far away from you

Why's it that
The sick is all you see
The colors, they bleed
And get a reaction
To kill all that matters
The hate is all you feel
Covered in red
Call it a mystery
Caught in the misery
Let's all start running

Feel me fall
It's okay too drop
Don't waste it away
Or fear that you'll never find peace in space
Don't waste away

The sick is all you see
The colors, they bleed
And get a reaction
To kill all that matters
Justify all the fears you want
Disasters all you need
The hate is all you feel
Covered in red
Call it a mystery
Caught in the misery
Let's all start running
