Mend

Morgan Wade

I was out of my head as I climbed in your bed
And I thought I'd found something real
You were asleep, I could feel you breathe
I still love how that made me feel

I am not much of anything
You will always be everything

Turn that car around
You don't need to be leaving me now
Come to bed and I will shut my mouth
And I don't know what's wrong with me
But you came along and finally I see
The type of love I know I need
No words spoken, I'm so broken
I hope you can mend me

And then we walked around every inch of this town
As I nearly gave you my heart
And I fell too fast and I knew it wouldn't last
You told me it was bad from the start

My white flag is up, I'm surrounded
You've got me feeling grounded

Turn that car around
You don't need to be leaving me now
Come to bed and I will shut my mouth
'Cause I don't know what's wrong with me
But you came along and finally I see
The type of love I know I need
No words spoken, I'm so broken
I hope you can mend me

And you walked away
Didn't know what to say
So I, I just waved goodbye
I took a step and let out my breath
And I stared straight into that sky
I felt like you betrayed me
Now I'm thinking you've saved me

Turn that car around
You don't need to be leaving me now
Come to bed and I will shut my mouth
'Cause I don't know what's wrong with me
But you came along and finally I see
The type of love I know I need
No words spoken, I'm so broken
I hope you can mend me
