

# Opportunity Is Gone

Morgoth

This world seems too cheap for us  
in coming life there is no trust  
spoiling everything we see  
to slave the nature  
to set us free

Pollution - is there no way  
for ourselves to betray  
this world lays in it's last breath  
nuclear fever garbage and death

We burn down what gives us the right  
we amputate - we steal the light  
only money is what we trust  
the end of life is coming fast - Now!

Our hunger will give the ultimate impulse  
death for you and me  
our salvation - effect that will exhaust  
senseless mortality  
Mindexpanding we see what we have done  
Opportunity is gone - Right now!!

With fear we see the world turn red  
no way to save us from the dead  
season of the wasted land  
careless we provoke the end

No more wisdom for the earth  
this is not a planets rebirth  
freedom will ignore our fear  
no chance in the end so near

This world seems too cheap for us  
in coming life there is no trust  
spoiling everything we see  
to slave the nature  
to set us free

Pollution - is there no way  
for ourselves to betray  
this world lays in it's last breath  
nuclear fever garbage and death

We burn down what gives us the right  
we amputate - we steal the light  
only money is what we trust  
the end of all the life is coming - Fast!

Our hunger will give the ultimate impulse  
death for you and me  
our salvation - effect that will exhaust  
senseless mortality  
Mindexpanding we see what we have done  
Opportunity is gone
