

Something Only We Know

Morissette

I don't know a lot of things
Wish I could tell you why all these feelings
Are welling up inside of me
And taking me back to all those evenings

Where we didn't do much but converse
And tell each other of what we were dreaming
I could travel through this universe
See every smile but they'd all be fleeting

In your arms, it feels like home
This is something only we know
You're my northern star up close
This is something only we know
Something only we know

I have heard so many names
But yours is still the one with so much meaning
I know that you still feel the same (Feel the same)
We set the bar real high and now you're stealing

My heart all over again
But we can take things slow and just be friends (Friends)
You know I want you till the end
Cause no else can fill this space like you can

In your arms, it feels like home (Feels like home)
This is something only we know (Only we know)
You're my northern star up close
This is something only we know (Only we know)

In your arms, it feels like home (Feels like home)
This is something only we know (Something only we know)
You're my northern star up close
This is something only we know
Something only we know

(Something only we)
Oh (Something only we know)
