

# I Do This for You

Giorgio Moroder

Look at me down to every pixel  
Do you really get the whole picture?  
Watching 3D, color by color  
There's more than all this pretty  
If you look under the cover

I do this for you, I only do this for you  
I do this for you, I only do this for you

Can't you feed me, I'll go down later  
I'm not hiding under no filter  
I set my heart on fire to make my love shine brighter  
I'd give it all if you're ready to take it

I do this for you, I only do this for you  
I do this for you, I only do this for you

I give it all, I'm turning inside out  
I'm giving up, if you don't know by now  
You're everything I see, why don't you save me?  
And all I really need is you to need me  
I do it, I do it, I do it, I do it

I do this for you, I only do this for you  
I do this for you, I only do this for you

I do this for you, I only do this for you  
I do this for you
