

Together

Morrisson

Yo, I've always been good out here on my own
Never relied on no one, but when you're out here with the right people, them
extra hands are always gonna make us stronger together

Yo, keep it a hundred with me and I'll keep it a hundred with you
It's as simple as that
Now let's share all our stress, and let's share all our problems
Let's solve 'em together, let's figure them out
We're good on our own, but we're stronger together
I'm good with these two hands but four hands are better
It's robbery time, let's go rob them together
Let's bag up these boxes and shot 'em together
'Cause I'm on whatever
Got your back and I got it forever
Your opps are my opps, let's go war them together
Suttin' gone dead if I put on these leathers (yo, yo)
My home is your home, you can stay when you want
And my clothes are your clothes, you can wear when you want 'em
My trainers, my tracksuit, my socks and my boxers
Wear when you want 'em
As I said bro I've got ya (I said bro I've got ya)
Just don't take my kindness for weakness
And don't take my friendship for granted
Cuh these two hands that I feed with
The same hands I put on a mask with
The same hands I squeeze on my gun with
The same hands I swing round my borer
I'll cut man (cut you)
I can kill you with the same hands I feed you with
If you don't keep it a hundred
Yo, said you've got my back, then I've got your back
And if you've got the vision, then I've got the plan
If you've got the digits then I've got the packs
If you've got the bullets then I've got the wap
And if one of us eats, then we both eat together
If one of us starves then we both starve together
And if our ship sinks, then we're sinking together
And if we get rich, then we get rich together

So keep it a hundred with me and I'll keep it a hundred with you
It's as simple as that
Now let's share all our stress, and let's share all our problems
Let's solve 'em together, let's figure them out
We're good on our own, but we're stronger together
I'm good with these two hands but four hands are better
(Four hands are better, four hands are better)
I said I'm good with these two hands but four hands are better
Keep it a hundred with me and I'll keep it a hundred with you
It's as simple as that
Now let's share all our stress, and let's share all our problems
Let's solve 'em together, let's figure them out
We're good on our own, but we're stronger together
I'm good with these two hands but four hands are better
(Four hands are better, four hands are better)
I said I'm good with these two hands but four hands are better

Yo, fuck a hundred, I'll keep it a thousand with you

From early you know I've been out here with you
I see most of the man you brought round here with you
And most of them only come round here for food
Becah nobodies growing it louder than you
I was there when most of them doubted you too
And I'm glad that you kicked them man out of the crew
Like trust me, there's nobody prouder of you
'Cause you bought me clothes when my ones were holey
When I'm linkin' hoes you give me your Rolly
You told me that slow dough's better than no dough
I learnt to have patience, I'm gettin' it slowly
I'm nothin' like them man, I'll never get greedy
Like how can I bite on the same ones that feed me?
I'll always be there whenever you need me
I stand on my word, I just hope you believe me
You gave man a box for keepin' it G
You gave man a Glock when I said I had beef
You gave man a crop when I needed some P's
Gave man on the block a whole pattern to eat
You taught me to rob, you taught me to crop
You taught me to shot and get rid of a box
You taught me to plot and drill on the opps
From chillin' on blocks to sittin' on yachts
I got your back, 'cause you got my back
And I've got the vision and you've got the plan
I've got the digits and you've got the packs
I've got the bullets and you've got the wap
If one of us eats, we're eatin' together
If one of us starves, we're starvin' together
And if our ship sinks, we're sinkin' together
And if we get rich, we get rich together

So keep it a hundred with me and I'll keep it a hundred with you
It's as simple as that
Now let's share all our stress, and let's share all our problems
Let's solve 'em together, let's figure them out
We're good on our own, but we're stronger together
I'm good with these two hands but four hands are better
(Four hands are better, four hands are better)
I said I'm good with these two hands but four hands are better
Keep it a hundred with me and I'll keep it a hundred with you
It's as simple as that
Now let's share all our stress, and let's share all our problems
Let's solve 'em together, let's figure them out
We're good on our own, but we're stronger together
I'm good with these two hands but four hands are better
(Four hands are better, four hands are better)
I said I'm good with these two hands but four hands are better
