

# Antidote

Mortemia

Take a deep dive into your mind  
Searching for keys although they seem too hard to find  
Take a long hard look inside yourself  
Search for the answers deep within a wishing well

All of these scars inside me  
This life that binds me  
To a broken past  
The shadows of past defines me  
What's right beside me  
Forever side by side

Here's to the moment and to times pass by  
Here's to the deeper sea and to the scarlet sky  
Hidden keys, concealed door  
Searching for reason, searching for the antidote

All of these scars inside me  
This life that binds me  
To a broken past  
The shadows of past defines me  
What's right beside me  
Forever side by side

In the deepest gardens, in a symphony of night  
In the steps you're searching for the hidden keys to light  
Searching high and low [?]  
In your darkest hours all your [?]

All of these scars inside me  
This life that binds me  
To a broken past  
The shadows of past defines me  
What's right beside me  
Forever side by side

All of these scars inside me  
This life that binds me  
To a broken past (To a broken past)  
The shadows of past defines me  
What's right beside me  
Forever side by side
