

## Werewolf Hunt

Morton

Listen! Silent night's cut with hungry growl  
Beasts are here and they've heard the leader's call  
Listen! It is fear, stranger's steps around  
Pack flies through the dark, shadows hide their run

Look out! Hundred eyes gleaming like the stars  
Thousand times they've seen how the victim dies  
Look out! Hold you chance, vanquish your own fear  
Werewolves took your trace, werewolves are near

You almost feel the caress of their jaws  
You've got your bare hands against teeth and claws  
They owe the night. They will rend. They will gnaw.

Know that nightmare's here, just behind your back  
No chance to survive werewolves' attack  
Know that every step is a deal with fate  
Try to save your life while it's not too late

Is it just a dream? Just awaken!  
Try to banish it, try to break it!  
You are out of breath, you are hunted  
No it can't be death! It's a nightmare!

They're hunting you like the hounds hunt the brute  
You'll meet your doom at the end of pursuit  
It's just the night. Just the moon.  
Just the woods...
