

A Soldier's Dream

Mos Def

I'm not gon sing a song or nothing.
Um, what that term they call it post traumatic stress syndrome?
That thing that
uh, soldiers will get. I think a lot of people get that. It's
like when you
experience somethin and uh, it affects you for a long time after
wards. I guess
everything works that way. Certain things have more impact than
others.
Sometimes it visits you in your dreams or when you're quiet or
just at peace or
trying to be at peace. A lot of soldiers get it. A lot of common
people get
it. A lot of the time common people are soldiers, that's just the
way it works
out.
This is a soldier's dream
The other night I was tumbling towards an uneasy sleep
When I had discovered myself
Atop the sweet sticky firmament of my dreams.
Daybreak came and discovered me
With my fantasies pasted to my face.
I cant look at you right now.
