

# Matter

Mosaic MSC

You are so giving  
Constant with grace  
All I can do is praise You  
Praise You with thanks  
You are so loyal  
You stand by my side  
All I can do is trust You  
With all of my life

I'm only static without You, without You  
And I'm empty matter without You, without You

And it all starts  
And it all starts with You  
And it all starts  
And it all starts with You  
And it all starts, oh  
And it all starts with You

You are so brilliant  
You're one of a kind  
All I can do is love You  
All of my life

I'm only static without You, without You  
And I'm empty matter without You, without You

And it all starts  
And it all starts with You  
And it all starts  
And it all starts with You  
And it all starts  
And it all starts with You

I was lost in space  
Drifting out to the darkness  
Feet won't touch the ground  
You are the gravity that  
Pulled me out of the shadows  
Here it all begins  
And now that You found me  
I know You love me to the end

And it all starts (It all starts with You)  
And it all starts with You  
And it all starts  
Oh, and it all starts with You  
And it all starts (It all starts with You)  
And it all starts with You  
And it all starts (It all starts with You)  
And it all starts with You
