

Close Enough

MOTHICA

If we're close enough, Why
Am I still hurting
If you open up, I
Don't have to worry

Cause I've been where you've been before
I know what you're looking for
You get tired of what you have
So you better look somewhere else

If we're close enough
Why am I still hurting
If you open up
I don't have to worry

Cause I've been where you've been before
I know what you're looking for
You're not happy with what you have
So you better look somewhere
You better look somewhere else
