

I come home to lights off, missed calls, don't even bother
Can't sleep, can't eat, I'm underwater
There's nothing that you can say, I've always felt this way
Left out, leftovers on the counter
Feels like I'm only sinking further
There's nothing that you can say, just chemicals in my brain

There's a little voice running through my head
Reminding me of the stupid things I said
All the mistakes I've ever made
Playing over again

On the upside, everything's gonna be just fine
I'm already dead on the inside
Nobody can hurt me now
On the outside, having the time of my life
Hanging with people I don't like
Nobody can hurt me now
Nobody can hurt me now, ooh
Nobody can hurt me now, ooh
Nobody can hurt me

Bloodshot, no tears, at least it's something
Still here, didn't even see you coming
I don't like the way it feels but at least I can say it's real

There's a little voice running through my head
Reminding me of the stupid things I said
I let the monsters in my bed, they say

On the upside, everything's gonna be just fine
I'm already dead on the inside
Nobody can hurt me now
On the outside, having the time of my life
Hanging with people I don't like
Nobody can hurt me now
Nobody can hurt me now, ooh
Nobody can hurt me now, ooh
Nobody can hurt me

Now, ooh
Nobody can hurt me now, ooh
Nobody can hurt me now
