

# Fell in Love Without You

Motion City Soundtrack

Last night I fell in love without you.  
I waved goodbye to that heart of mine  
Beating solo on your lawn

Every aching wound will cauterize and bruise  
In memory of what we used to call in love  
And only time will tell if violins will swell  
In memory of what we used to call in love  
Used to call it love

Last night I fell in love without you  
The cou de gras that set me off  
Would've made for decent fiction

Every aching wound will cauterize and bruise  
In memory of what we used to call in love  
And only time will tell if violins will swell  
In memory of what we used to call in love  
Used to call it...

Last night I fell in love without you  
The stars at night aren't as big and bright  
As you make them out to be

Every aching wound will cauterize and bruise  
In memory of what we used to call in love  
And only time will tell if violins will swell  
In memory of what we used to call in love  
In memory of when we used to call it love
