The Samurai Code

Motion City Soundtrack

I had a dream now it's gone so I'm going in alone today
Trap all the driftwood thoughts I'd rather just ignore
I had a plan but it turned now I'm peeling it the other way
Can't quit lost cause non-stop anywhere but here

You hope for the best but the best always leave you behind
I'd like to anchor some day

I had a dream now it's gone so I'm going in alone today
Crash now I'm fractured all hands rotten to the core
I tried to run from the fog, it unraveled me and here I stay
No hopes skyline got shot over and I'm done

You hope for the best but the best always leave you behind
I'd like to anchor some day
I'd like to anchor and stay

You hope for the best but the best always leave you behind
I'd like to anchor some day
I'd like to anchor and stay

Dragging my heels like a broken record
Taking the fall like a champion
My heart belongs beneath the ocean floor

Starving myself in the name of progress
Clutching the tide as the ship goes down
My heart belongs beneath the ocean floor

Finding the time to embrace each moment
Shouldn't be hard it's the hardest thing
There is, there is

No hope for the best cause the best always leave you behind
You hope for the best but you just end up losing your mind

You hope for the best but the best always leave you behind
I'd like to anchor some day
I'd like to anchor and stay
