

Cyberhex

Motionless in White

Oh

There's no tomorrow
Life is but an echo
Scars become mementos
This is war

Extinction
Ashes on your pale skin
Love becomes a symptom
Of the cure

Initiate cyberhex
Eliminate threat

I'd pull the sun from the sky
To freeze the future of time
And drift as one through the infinite (Hold on)
I found asylum inside
Your Armageddon eyes
I'd kill to kiss your apocalips

Cold and corrosive
Fatal diagnosis
Ring around the roses
Say goodbye (Say goodbye)

We're broken down to build it up
'Cause analog life's digital enough
(Cy) initiate (-ber) the cyberhex (Hex)
The only way to win is to reconnect
Stay alive, stay alive

Pull the sun from the sky
To freeze the future of time
And drift as one through the infinite (Hold on)
I found asylum inside
Your Armageddon eyes
I'd kill to kiss your apocalips

Do you wanna live? (Yeah)
Are you willing to die? (Hoorah)
When heaven falls, I will be your light
Love will survive
In this hell, you are my paradise

Walk with me to the end
Take my hand, oblivion
My heart is yours 'til we meet again
I'll see you in oblivion

I found asylum inside
Your Armageddon eyes
And drift as one through the infinite
And though our fates synchronize
I wasn't willing to die
Until I kissed your apocalips

(Pick it up)

Annihilate
Our end of days
Love will find a way
Death shatters and after
A thousand suns (Suns)
Hope has not lost (Lost)
Love has found a way
I will not terminate
I will annihilate
