

Hellbreaker

Motorjesus

Time to spill a little bit of gasoline
Heading for damnation
In the world between
Try to live in peace
But the world is now on fire

Living for the war
For the battle be born
Get yourself together
Gotta be the one
Try to move ahead
Cause you live beneath the wire

On the frontline
Set the world ablaze
Get what you deserve
Better you erase
You'll gonna be the renegade of
death and fire

Ready for new ways unknown
Saints and sinners now have shown
All is ruined and left undone
Come repent for your sins and
you'll be forgiven now

When the war has come
When it's hit and run
No salvation this is still the way we are
Run it down and return
Now it's gonna crash and burn
This will be the final wreckage of it all
You gotta start the car wars

Aiming for the target
In the blood red sky
Strike and turn to dust
When the bullets fly
Man behind the wheel
It's a new defined religion

Come along and raise a little hell for me
Crashing your opponents
Now that you can see
You can pay the price
The final goal is what you need

It's a brand new dawn you feel
Now you go burn down the wheel
All for one, you feel the steel
The demolition is real
And you'll be the sinner now

When the war has come...

Run down and running out
Your engine's screaming loud

When all the sinners come around
The final conflict now
And try to break'em down
That's what this life is all about
And go to hell!

When the war has come...
