

Evaporating Sun

Mr.Kitty

I will watch the sky
As it turns to black
And I see the stars
Constellations map

Where I need to be
At this point in time
The lights are overheard
Burning bright at night

Stranger follows me
While on my trek
Do I know you sir
Have we ever met

He said not to take
Winding roads alone
You will not return
You will be unknown

My heart will rot
I'll carry on
Habits won't die
Take over me
I live in fear
Do not haunt me
Leave me alone
Please, don't hurt me

On a burning bridge
I'm biding my time
No one is around
The end is close by

I spot something strange
Pleasing to the eye
Portal leading to
Dimensional dives

Take a step inside
To surprise I find
Stranger from before
He speaks one more time

I've warned you before
I'll tell you again
Your face is unknown
Things won't be the same

My heart will rot
I'll carry on
Habits won't die
Take over me
I live in fear
Do not haunt me
Leave me alone
Please, don't hurt me
