

# Memories

Mr.Kitty

When I turn off my computer  
See myself inside the mirror  
Think of all the ones and zeroes  
Empty as the play screen, waiting for tomorrow  
I think my system needs a reset  
Alt, control, then delete me  
Disconnecting the fluorescence  
Giving me the essence of being free from myself

Memories I can't erase  
Old emotions I backspace  
Logging out for a change  
Nothing ever stays the same  
Images in the recycle bin  
Pixels fade and I lie within  
Were you ever really here?  
In a dream you reappear

[?] save the cache and the data  
Corrupting the sector, keeping me away from  
A world so artificial, giving me the signal  
A light and a sickle, this is my dismissal  
Uninstall program, back to being human  
Losing my perception, all is not perfection  
Analyzing nothing, turning into something  
Reality is closed, but the new world is open

Memories I can't erase  
Old emotions I backspace  
Logging out for a change  
Nothing ever stays the same  
Images in the recycle bin  
Pixels fade and I lie within  
Were you ever really here?  
In a dream you reappear

I know it's hard, please trust in me  
I know it's hard, please trust in me  
I know it's hard, please trust in me  
I know it's hard, please trust in me
