

# No Heart

Mr.Kitty

At 3am, I leave my home to walk the roads alone  
To wander into the unknown  
I know the way, there isn't room for you to come and stay  
The darkness doesn't know your name  
Passing the lights, I hide my face for fear of being found  
I'm not myself when you're around  
When we're apart, the weight is lifted from my failing heart  
I let you go and now I know I can restart

As time stands still, I see you fall  
With no regrets (no regrets), I will stand tall  
Don't be afraid, erase this part  
You can't relate (can't relate) when you have no heart

I see the stars, as I destroy myself they light the way  
I lose your touch throughout the day  
Caught in a daze, the grip that held me soon begins to fade  
A cloud of smoke is my charade  
I know you well, but you know more than I can truly tell  
We're always locked into a spell  
When they find out, they'll ask you what it's really all about  
Don't say a word, run faster now, I'll cut you out

As time stands still, I see you fall  
With no regrets (no regrets), I will stand tall  
Don't be afraid, erase this part  
You can't relate (can't relate) when you have no heart  
As time stands still, I see you fall  
With no regrets (no regrets), I will stand tall  
Don't be afraid, erase this part  
You can't relate (can't relate) when you have no heart
