

Bigfoot

Mt. Joy

White kids don't dance
They just follow commands
Put your right foot in
Leave your heart in your hand
And spin like the record
I was making for you
You promised us forever
Now I'm spinning alone, it's true

But Bigfoot is out there just knowing you don't care
About his life in solitude
He's dancing with the lonely, he'd choose you only
He'd rock from side to side

And your life will change straight out of the blue
The clouds in your mind, just passing through
Imagine the horses when you set 'em free, go
Tear down the beaches of Chincoteague

But Bigfoot is out there just knowing you don't care
About his life in solitude
He's dancing with the lonely he'd chose you only
He'd rock from side to side

Stay if you want to
Leave if you have to
I want to see him through the dark
Stay if you want to
Leave if you have to
I want to see him through the dark

What love is gonna change your mind?
What love is gonna change your mind?
And Bigfoot running through the end of time
What love is gonna change your mind?
