

# She's Got It

**Muddy Waters**

I want everybody, take a look at this little girl  
Her mother give her something to take her through the world

Woah, she's got it  
She got it right from the start  
And if she ever leave me  
You know it's going to break my heart

She got a real soft voice with a mellow tone  
Whatever she got, I can't leave alone

Woah, she's got it  
She got it right from the start  
And if she ever leave me  
You know it's going to break my heart

Woah don't leave, woman you know it's going to break my heart

She's five foot four and a coffee coloured brown  
She knows what to do when my love come 'round

She's got it  
Woah, she's got it right from the start  
And if she ever leave me  
You know it's going to break my heart
