Wilder Mind

Mumford & Sons

It's in my blood, it's in my water You try to tame me, tame me from the start When the din is in your eye, flash your flesh Desperate for a need to rise

With a silver crystal on How well you used to know how to shine In the place that's safe from harm I had been blessed with a wilder mind

You can be every little thing you want nobody to know And you can try to drown out the street below And you can call it love If you want

Beholden now I find myself awake Waiting on the edge again You sleep so sound with your mind made up Drinking from your cup of broken ends

With a silver crystal on How well you used to know how to shine In the place that's safe from harm I had been blessed with a wilder mind

You can be every little thing you want nobody to know And you can try to drown out the street below And you can call it love If you want

But I thought we believed in an endless love (2x)
