

Make Me Forget

Muni Long

Yeah, mmm, mmm

When the one that I'm with ain't the one that I want
I wanna fight for my love, I want a united front
I'm an alpha and (I am) I need a alpha man (Man)
Need him to understand there's power in the tongue (Ooh)

So speak to my heart, babe, speak to the queen in me
Though we might disagree, don't say nothin' you don't mean
Know when to walk away (Walk away), when I'd rather let you stay
Gently put me in my place, leave when I need some space

Want you to make me forget
Please, can you make me forget?
I want you to make me forget
Anything before you I didn't feel like this

And we already know that we both need to grow
So if we grow apart it's 'cause that's the path we chose (Chose)
Long as you keep me safe (Mmm), I can love you with grace (Mmm)
But it's not a mistake (Mmm), if it's one that you constantly make

So don't break my trust, babe, love over lust, babe
I'm not ashamed to admit that I'm insane for you
I just can't walk away, when I know that I'd rather stay
Gently put me in my place, leave when I need my space

Want you to make me forget
Please, can you make me forget?
I want you to make me forget
Anything before you I didn't feel like this
