

Midnight Drives

Munn

One more time

Midnight drives in your car
It's too cold for mine
Threw that rock through my back window last July

You'd never fall for a girl like me
I had a feeling all along what we could be
Every other night when we're fighting
You could lie to my face, and I'd believe

Nobody I'd rather turn to
We can fall, we can break a thousand times
Only feeling is for you
I guess the world made me numb to all its lies

Midnight drives in your car
It's too cold for mine
Threw that rock through my back window last July

I'm not the guy that you're looking for
You get attached, I'll mess up and push you away
You could leave, there's an open door
But if you wanna stay

Nobody I'd rather turn to
We can fall, we can break a thousand times
Only feeling is for you
I guess the world made me numb to all its lies

Midnight drives in your car
It's too cold for mine
Threw that rock through my back window last July

I won't beg you to stay
But I don't wanna fall for someone new
I know I've made some mistakes
But I still want you
I won't ask you to change
'Cause I don't wanna fall for someone new
Try to erase the pain
'Cause I still want you

Midnight drives in your car
It's too cold for mine
Threw that rock through my back window last July
