

## Ghosts (How Can I Move On)

Muse

Now and then  
My mind drifts to a place where I find you  
Lost in my head  
There are unsolved feelings that haunt me  
It's too late to heal  
I'll lay them to rest

How can I move on  
When everyone I see still talks about you?  
How can I move on  
When all the best things I have we made together?  
Here's to letting go  
But I am lost in a void with your ghost and our memories  
Lest we forget  
The great reset

If I could bring you back  
There are truths and confessions I'd tell you  
I'd set things straight  
And I believe that you would love and forgive me  
I know it's too late  
I need to let go

And how can I move on  
When everyone I see still talks about you?  
How can I move on  
When all the best things I have we built together?  
Here's to letting go  
But I am trapped in a void with your ghost and our memories  
Lest we forget  
The great reset

How can I sleep with this coldness beside me?  
How can I sleep with this coldness inside me?  
I know I can't bring back your love

How can I move on  
When everyone I see still talks about you?  
How can I move on  
When all the best things I have we made together?  
Here's to letting go  
But I am lost in a void with your ghost and our memories  
Lest we forget  
The great reset
