

Burn It Down

Mustard Plug

Last place in a one-man race, I'm lost
Why try when the trophy's up for sale
It's over now
Early choices, no excuses
Bond tied and destitute, my friend
Where are you now?

Now that you've reached the end
Scream at the wall cause there's no one listening
Now that we reached the end
Turn up the heat just to watch it all burn down

In a nowhere town
Burn it down
And let that come fall to the ground

Sit alone with a bottle in my hand
Broken promise, empty dreams be damned
One last request
My echo lost a translation
Fading shadow of my reflection gone
It disappears

Now that you've reached the end
Scream at the wall cause there's no one listening
Now that we reached the end
Turn up the heat just to watch it all burn down

In a nowhere town
Burn it down
And let that come fall to the ground

10 9 8 7 6
Now we're all in quite a fix
5 4 3 2 1
[?] all come undone

In a nowhere town
Burn it down
And let that come fall to the ground
