

Fall Apart

Mustard Plug

Staring down a question
Running out of time
Nothing's taught me anything
Losing all my mind

My plan became so simple
My plan was guaranteed
Now I got no plan at all
Now I got no need
No need to waste your time

Feed the cancer of your ghost
All the things I love the most
Are slowly, slowly killing me
Walk another lonely path
All your questions, never asked
Drown me, drown me in a waste
Never knowing you

Nothing lasts forever
Some things never stop
Slowly we surrender
To things that fall apart
Yeah all things fall apart

Feed the cancer of your ghost
All the things I love the most
Are slowly, slowly killing me
Walk another lonely path
All your questions, never asked
Drown me, drown me in a waste
Never knowing you
Never knowing you

Feed the cancer of your ghost
All the things I love the most
Are slowly, slowly killing me
Walk another lonely path
All your questions, never asked
Drown me, drown me in a waste
Never knowing you

Never knowing you
Never knowing you
All things fall apart
Never knowing you
