

Springtime

Mustard Plug

Springtime
A little welcome mat for summer
Springtime
Because the winter was a bummer
Find a shady tree where I can stop and sit

Springtime
The grass is growing right below me
Springtime
I know my summer clothes are lonely
I've grown so much this year I hope they all still fit

In the fall you rake leaves
And you're going back to school
A chill is in the air
And they're shutting down the pool
The summer's really hot
With all the grass you've got to mow
You're sticky and you're sweaty
From your head down to your toes

Springtime
I'm going to stop and smell the flowers
Springtime
Or maybe sit and sniff for hours
Then lay down and watch a couple of clouds go by

Springtime
I'm feeling happy for no reason
Springtime
This is by far my favorite season
And if you're not so sure I'm going to tell you why

The winter's so cold
When you're shoveling all the snow
Your nose is always running
Do you sniff or do you blow?
Three seasons of the year
Is how long I have to wait
The clouds are gone the days are long
And everything is great, it's

Springtime
And now I've told you all about it
Springtime
And now I want to hear you shout it!
Springtime! Springtime! Springtime!
Springtime, springtime

Springtime
And now I've told you all about it
Springtime
And now I want to hear you shout it!
Springtime! Springtime! Springtime!
Springtime, springtime

No video games it's too nice today

Turn the TV off and go out to play
Sun is shining that's where I'll stay
All springtime

No video games it's too nice today
Turn the TV off and go out and play
Sun is shining that's where I'll stay
All springtime
