

Down to Earth

Mustasch

I have been toxic, I was spinning the wheel
The other tossers they were baffled with me
They said that hatred was the gospel I needed
Now I'm addicted to another feeling
I'm alive and I love it

Wherever I am is my universe
And I don't care about space time curve
I've always felt that I am out of this world
I'm anything but down to earth

Being a stryder I have striding enough
Unpack the bags I am leaving the dust
They say that all roads lead to Rome
My hatred left, I am finally at home
I'm in love and I love it

Wherever I am is my universe
And I don't care about space time curve
I've always felt that I am out of this world
I'm anything but down

The rider of the storm returning home
The sibling of sin, a prodigal son
A dealer of doubt who never gave up
Sailing in to the light

Wherever I am is my universe
And I don't care about space time curve
I've always felt that I am out of this world
I'm anything but down to earth
