

# Distance

Mutemath

Foreign ground  
We've built homes upon and tore them down  
Still moving on this treadmill world  
I know I promised you more by now  
But there are bonds that were formed instead  
For the better or worse we bled  
And I know there's still hard roads ahead  
And no one else I'd rather walk them with

We've come a long way together  
We don't need the sun  
We can shine through whatever  
We are one  
There could be mountains between us  
Higher than the stars  
But there'll never be a distance  
That can tear us apart

Endless start  
Gave us our role, we played our part  
Like a soldier at constant war  
Any love worth a thing  
Is worth fighting for

We've come a long way together  
We don't need the sun  
We can shine through forever  
We are one  
There could be mountains between us  
Higher than the stars  
But there'll never be a distance  
That can tear us apart

You're the light that shines for me  
You're the light that shines for me  
You're the light that shines for me  
You're the light that shines  
You're the light that shines for me

We've come a long way together  
We don't need the sun  
We can shine through forever  
We are one  
There could be mountains between us  
Higher than the stars  
But there'll never be a distance  
That can tear us apart

There'll never be a distance  
There'll never be a distance  
There'll never be a distance  
There'll never be a distance
