Mutemath

I've got to see what's on the camera
I'm just a fiend for yesterday
How can I break out of it's handle
I'm just a train of thought away

Away it goes
Away it goes, away it goes

Everything's new, everything's new
Beautiful city lights look bright tonight
And calling out for you
Everything's new
Everything's

I'm not the type to run in circles
But I keep waking up the same
When getting over all the hurdles
You can't keep holding on to one just in case

Everything, everything

Everything's new, everything's new
Beautiful city lights look bright tonight
And calling out for you
Everything's new

Do what you do and keep heading nowhere
Stay on your pace, let the future beware
Do what you do and keep heading nowhere
Stay on your pace, let the future beware

Do what you do and keep heading nowhere
Stay on your pace, let the future beware
Do what you do and keep heading nowhere
Stay on your pace, let the future beware

Do what you do and keep heading nowhere
Stay on your pace, let the future beware
Do what you do and keep heading nowhere (Everything, everywhere, ever ything)
Stay on your pace, let the future beware (It's all something new, it's all something new)

Do what you do and keep heading nowhere (Everything, everywhere, ever ything)
Stay on your pace, let the future beware (It's all something new, it's all something new)
Do what you do and keep heading nowhere
Stay on your pace, let the future beware
