

Hell Or High Water

Mutemath

Come for what you want from me
Distractions from reality
And maybe we won't hear the sound
We make when we're crashing down

Come hell, come hell or high water
Come hell, come hell or high water

Don't you see the world is nice
Everyone is on your side
But maybe we should just suppose
It's probably not the way it goes

Come hell, come hell or high water
As far as I can tell, that won't be much farther
It won't be much farther

Search for a sign and rescue what you suffer
Hold on tonight, your questions will be answered
Hell may come by and trample on the course we travel
But know every time, it's nothing we've not been through before

Flooded streets may weep tonight
And tell us all of angry skies
When broken banks are breaking news
I'll be swimming back for you

Come hell, come hell or high water
As far as I can tell, that won't be much farther
It won't be much farther

Search for a sign and rescue what you suffer
Hold on tonight, your questions will be answered
Hell may come by and trample on the course we travel
But know every time, it's nothing we've not been through before
