

I'm getting tired always going to my head  
Everything I don't say is everything that I regret  
Why's growing older filled with all these growing pains  
Now do this, don't do that  
Take a step from the past

You  
It all makes sense when I'm with you  
You're in my headphones in my room  
You lift me up to see the view  
(The view, the view, the view)

Woohoo, woohoo  
I only wanna be with you-oo woohoo  
It doesn't matter what you say or what you do  
My number one, I'll be yours too  
Like, woohoo, woohoo  
I only wanna be with you  
(You)

My greatest fear was ending up all by myself  
But I would rather be alone than be with someone else  
You take the darkest days and fill them up with light  
Turn the greys into blues  
Into little diamonds in the sky

Woohoo, woohoo  
I only wanna be with you-oo woohoo  
It doesn't matter what you say or what you do  
My number one, I'll be yours too  
Like, woohoo, woohoo  
I only wanna be with you

(I only wanna be with you)
