

Fever Dream

MxPx

Do you remember being stuck inside
Thought about running while I tried to hide
Under the covers with you
We didn't come out till June

Probably should've waited till the 4th of July
Like spending all those evenings warming by the fire
Underneath the blankets the view was perfect
I could stay down under there all year, you're perfect

You're my fever dream
I'm damaged, you're pristine
When we were bored out of our minds
We thought up crazy things
But was it all a fever dream?

February came and went like lovers do
I made the bed I washed a dish or two
That time let us to take a step back and see
Plan the way we always wanted our lives to be
So please baby baby won't you stay
I can't stand to be six feet away
Cause I could spend all week in bed with you
And when I said I didn't wanna play. I lied. I do

You're my fever dream
I'm damaged, you're pristine
When we were bored out of our minds
We thought up crazy things
But was it all a fever dream?

Life was really good
Maybe too good to be true
That doesn't mean it wasn't hard for you
Fair winds are turning toward the people that stand up
For what is right and for the ones that can't rise up

I've had a lot of time to think things through
But all I've gotten done is having more to do
I miss the noisiness I miss the crowds
I miss the way we used to turn it up loud

You're my fever dream
I'm damaged, you're pristine
When we were bored out of our minds
We thought up crazy things

But was it all a fever dream?
You disinfected me
It's like we starred in our own movie
Call it anything, "A Quarantine Fever Dream"
