

# Set A Fire

MxPx

Are we living in a simulation?  
Or has society gone wild?  
I know the time is coming  
But will it be here for a while?  
I feel like I'm running scared  
My alarm bell's always ringing  
And it's too late to prepare

Cause I'm right outside the gates  
Cut close down to the wire  
There's no more time to waste  
No rest, no getting tired

Now I'm here to set a fire  
Ignite the flames and build it brighter  
Now I'm here to set a fire  
All the flames are rising higher

This is my time right now!  
So meet me in the streets  
There's so much more to do now  
Still hoping for some peace  
When I tried to find shelter  
I found that I was free  
To think of an idea and to build it to succeed

Cause I'm right outside the gates  
Cut close down to the wire  
There's no more time to waste  
No rest, no getting tired

Now I'm here to set a fire  
Ignite the flames and build it brighter  
Now I'm here to set a fire  
All the flames are rising higher

Cause I'm right outside the gates  
Cut close down to the wire  
There's no more time to waste  
No rest, no getting tired

Now I'm here to set a fire (Set a fire)  
Ignite the flames and build it brighter (Set a fire)  
Now I'm here to set a fire (Set a fire)  
All the flames are rising higher
