

The Way We Do

MxPx

I break my neck to give my family all they need
If giving blood was asked of me, then blood I'll bleed
If the earth opens up and somehow swallows me
Let me live on through the songs and stories

Like that time
When face to face destroyed our band
Our freezing balls, crossed Canada with Simple Plan
Or stealing third, from Bad Religions dressing room
Some night that old bus felt like a tomb

This is the way we do
Like the way we always wanted to
It's true, it's true
This is the way we do
This is the way we make this moment last past midnight like tee
nagers out past curfew
Yeah

I've failed so many times it don't bother me
Life will send us lessons like they grow on trees
There's no shortcuts in this life, so far that I've seen
But here are here we are where while I'm living the dream
Here we are where while I'm living the dream

Like that time we toured across America
And found we loved every corner of
This great green world and yet it's lonely on some nights
Crack the door and leave on the lights

This is the way we do
Like the way we always wanted to
It's true, it's true
This is the way we do
This is the way we make this moment last past midnight like tee
nagers out past curfew
Yeah
