

## Shape

### My Brightest Diamond

You'll never know how I may appear  
First time I'm like the wind  
Next time I'm like a stone  
You'll never know what shape I might take  
I might be the ghost or I might be  
Hiding in smoke

I am always beside you  
Though you cannot see me  
(I am always beside you)  
Nameless take a different shape  
(Though you cannot see me)  
Shape makes a new prismatic

You'll never know how I may appear  
First time I'm like a kiss  
Next time I come in force  
You never know from minute to minute where I'm going  
You never know minute to minute where I've come from  
You never know minute to minute if you'll find me  
I always know minute to minute I am near you

I am always beside you  
Though you cannot see me  
(I am always beside you)  
Nameless take a different shape  
(Though you cannot see me)  
Shape makes a new prismatic

Nameless take a different shape  
Everybody take a shape  
Shape makes a new prismatic  
Everybody take a shape

Take a different shape  
Take a different shape  
Everybody take a shape  
A different  
Everybody make a shape  
Take a different shape
