

## Parasite

## My Enemies & I

Bound and tortured I'm as good as dead  
My broken spirit can't take the punishment  
Please pull me out before there's nothing left to save  
Trapped in a horror, there is no escape

Night after night, real lies through dead eyes  
Will it end or magnify?  
A crushing thought, a heavy weight  
How much more can I really fucking take?  
We know the secrets, no means to an end  
The feeling dies, my heart's not mine  
Right after I come inside your web of lies

I don't need you  
I can bury my body just like yours  
You won't fuck with my head anymore  
I don't need you

Stop this piercing voice  
It keeps me up in the night  
All these words feed on my brain  
Like a parasite

Night after night we stare blank into the world  
I want to feel alive, I just want my life to be mine  
But you suck my soul like a leech on a wound  
The feeling dies, my heart's not mine, get out of my mind

I don't need you  
I can bury my body just like yours  
You won't fuck with my head anymore  
I don't need you  
Tell me, how are you sleeping?  
Will the guilt drown your feelings  
When you find the skeletons at your door?

How can I face this fucking world  
If I can't face myself or you anymore?

I can bury my body just like yours  
I can bury my body just like yours  
I can bury my body just like yours  
You won't fuck with my head anymore

Drowning you out  
I'm not listening anymore  
You've pulled me down enough  
There's nothing left to love

I don't need you  
I can bury my body just like yours  
You won't fuck with my head anymore  
I don't need you  
Tell me, how are you sleeping?  
Will the guilt drown your feelings  
When you find the skeletons at your door?

I don't need you
