

## Wolves Teeth

### My Enemies & I

How can you stand the sight of your own face when  
You don't even feel at home inside your own skin?

The worms crawl in and out of your ears  
Telling you exactly what you want to hear

I've sprawled across this broken glass  
You dragged me by my own feet  
I feel the blood rush down my back  
The pieces tearing at me

You were knocking at my door  
Like so many wolves before  
Trying to let you in  
You know I've spent all these nights alone  
Learning to walk again

Maybe one day you'll pick up all the pieces  
That you left along the way  
The mess you made is suffocating me

Just go  
Leave me here with my empty thoughts  
As these walls close around me  
Get out  
I don't care what you need to say  
Just get the fuck away

You were knocking at my door  
Like so many wolves before  
Trying to let you in  
You know I've spent all these nights alone  
Learning to walk again  
Trying to let you in  
You know I've spent all these nights alone  
While you're dancing on your toes

If you step back and watch your actions unfold  
You'll see the demons that you breed  
And how they fuck with my soul  
If you step back and watch your actions unfold  
You'll see the demons that you breed  
And now you'll burn with them

As I pull these knives out of my back again  
It's time that someone says what needs to be said  
Greedy fucking bitch  
All these days and nights I spend alone  
Unfaithful  
You'll never fucking learn from anything  
You're worthless

Just go  
Leave me here with my empty thoughts  
As these walls close around me  
Get out  
I don't care what you need to say

Just get the fuck away

You were knocking at my door  
Like so many wolves before  
Trying to let you in  
You know I've spent all these nights alone  
Learning to walk again  
Trying to let you in  
You know I've spent all these nights alone  
While you're dancing on your toes
